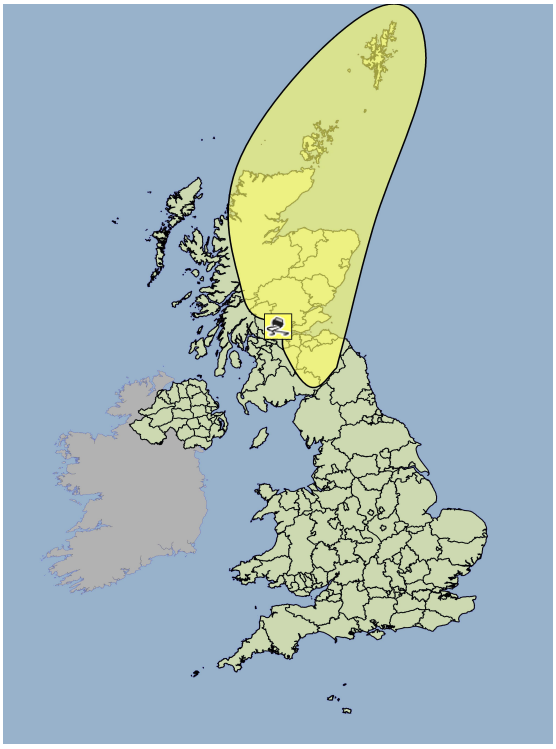
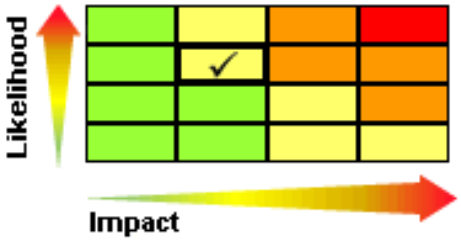
National Severe Weather Warning Service





Chief Forecasters Assessment
A band of rain will clear east into the North Sea during Friday evening. Clearing skies will allow temperatures to fall with ice readily forming on untreated surfaces later on Friday evening and overnight into Saturday morning. A scattering of snow showers in the west could also give 1 or 2 cm above 400 m adding to the ice risk. Temperatures will then start to recover from the southwest early on Saturday morning as cloud thickens.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **21:00 on Fri, 05th Feb 2016** until **09:00 on Sat, 06th Feb 2016**

Icy patches are expected to form on untreated surfaces on Friday evening and overnight into Saturday morning. Snow showers are also expected in the west, giving some accumulations on higher ground. Please be aware of these wintry hazards and the potential for some difficult driving conditions.
